

Remote Access

Take your science labs to the next level with Remote Access to nanotechnology instruments from your classroom!

Bring cutting-edge microscopy and lab instruments into your high school or college classroom by remotely accessing the Nanotechnology Lab at North Seattle College. Your students will be able to image and study materials using a Scanning Electron Microscope (SEM), Atomic Force Microscope (AFM), Profilometer, or Laser Scanning Confocal Microscope (LSCM). All your classroom needs is an internet connection and free software!
